Exam procedure from the subject „**Modeling of fluid flow with heat transfer**":

- I will write the credit at the earliest in the credit week (from 25.5.2020).

- If you have a credit, you will register for the exam on the dates listed in EDISONU. The number of student is not limeted.

- We will perform the exam by distance form only in written form. In following form:

  1) I will send you the assignment of the written exam at a predetermined time of the exam in pdf format, ie the introductory page for the exam and two tests. You print everything out and work it out on the printed documents at the specified time. There will always be enough space under the assignment to solve. If you do not have a printer, write the results on blank papers, mark the test variant and only the question numbers.

  2) Please sign each sheet of paper, scan the scanned test sheets or take a photo of your mobile phone and send it back.

  3) Testing time is 60 minutes, then you will scan, so within 90 minutes. We need to get your results back.

- We evaluate the tests and if the test is satisfactory, we write the result in EDISON.

Note.

Exam questions are in the file „Plan of lectures and seminars Modeling of fluid flow with heat transfer".

The conditions for taking the exam may change according to the orders of the Rector and the Dean.
